Capital Campaign Starts Off Strong!

The public phase of the Friends of the Modesto Library's Lifelong Legacy Capital Campaign is underway. The "silent phase" of the campaign, under the leadership of Fundraising Committee co-chairs Lynn Dickerson and Katy Menges, has already resulted in over \$1.8 million in pledges and donations. Now, the task is to reach out to the community at large so that everyone is aware of the campaign and has a chance to be involved.

For decades, the Modesto Library has stood as a haven where people of diverse backgrounds can read, learn, and build connections with one another. It has been 50 years since the library moved to its current location at 15th and I Street and the building is in need of renovation. The work to be done includes asbestos abatement, new carpet, lighting upgrades, and Americans with Disabilities Act corrections. These renovations, among many others, are estimated to cost around \$18 million.

FOML has committed to raise \$3 million for enhancements to the publicly funded portions of the massive project. Campaign funds will be used to upgrade technology and elevate the look and feel of the library with amenities like more comfortable seating, inviting public spaces and modern fixtures. FOML is bearing the cost of the campaign so that every dollar donated will go directly to the renovation.

FOML President Denise Nordell shared, "We realize that many people who may seldom visit the library themselves, nevertheless understand how important it is to have a vibrant library in the community – that's one of the reasons we are mounting the Lifelong Legacy Capital Campaign. So that our library can reopen not just as a building without asbestos, but a building that we can all be proud of."

Beverly Schlegel, FOML Vice President, said it best: "Libraries are connectors. They level the playing field and allow every member of our community – no matter their age, race, gender – access to resources that foster a sense of belonging, increase civic engagement, and encourage lifelong learning."
